

Poster Award Winners

Polymer Reaction Engineering VIII

May 2012, Cancun, Mexico

Three poster prizes for the best presentations by our “younger scientists” are sponsored by the Macromolecular Journals (Wiley-VCH). Each prize consists of books to a value of 200 Euros and a free 1-year subscription to Macromolecular Reaction Engineering.

Azide-terminated poly(vinylidene fluoride) as building block for nanocomposite materials and amphiphilic block copolymers
Rebekkah Siegmann, University of Potsdam, Germany

Quantitative NMR spectroscopy analysis for determination of polymer microstructure
Ruzica Kasalo, Technical University Darmstadt, Germany

Relating environmental stress cracking resistance (ESCR) of polyethylene with microstructural properties using tensile and extensional flow methods
Pouyan Sardashti, University of Waterloo, Canada
